

In the context of local government reform, and the development of Public Participation Networks (PPNs), The Community Participation Network (CPN) West was established in 2015 in the West of Ireland to help support the capacity of and direct representation of people with disabilities within local community structures. The CPN is made up of local people, voluntary disability organisations, local partnerships, family resource centres, and local community development project companies of within the Limerick, Galway and Mayo counties.

The work of the CPN is being supported nationally by the Disability Federation of Ireland (DFI).

Disability Federation of Ireland is a company limited by guarantee not having share capital, registered in Dublin.

It is the mission of Galway and Roscommon ETB to be a key provider of quality, inclusive education opportunities and support services that enable young people and adults to reach their full potential and contribute in a positive and meaningful way to society.
